

# THE NEVADA ASSEMBLY

*Land and Soil Jurisdiction*

1805 N. Carson Street #189, Carson City, Nevada 89701

**The Allegations and the Record**

---

## THE ALLEGATIONS AND THE RECORD

**What was said to the Continental Marshal Service about your Assembly, and what the record shows**

*The Nevada Assembly · Land and Soil Jurisdiction · 4 September 2026*

### Why this document exists

---

On 25 August 2026, Rockie Roper wrote to the Continental Marshal Service asking it to act against three people who serve this Assembly: Sue Hulsebus, Doug Hulsebus, and Michael Wilson. On 26 August, Anna Riezinger answered him and told nine recipients that Rockie's and Tamara Amaral's standing was settled, and that the Coordinator "may be removed if she doesn't course correct."

On 27 August, Boyd John Adams, Chief of the Continental Marshal Service, asked Nevada for its side. On 31 August this Assembly sent him a twenty-five page answer with every statement dated and sourced.

This document is shorter. It sets out what was said, and what this Assembly's own records show, so that you can weigh it yourself rather than take anyone's word for it — ours included.

**Nothing in here asks you to do anything.**

### One. That the Militia Commander was voted out

---

**What was said.** That Michael Wilson *"has been VOTED OUT by the People of June 27 2026,"* and that he is the *"Militia Commander"* — the quotation marks are Rockie's.

**What the record shows.**

The office is documented. Michael Wilson was elected by unanimous vote of The Nevada Assembly at the Business Meeting of **28 May 2025**, approved pending vetting. Vetting was submitted **30 May 2025**. The term runs to **30 May 2029**. The candidacy was on the published agenda in advance; the result is on the meeting recording; and the Vetting Committee's own first line to him was *"Congratulations on being elected Militia Commander."*

The meeting purporting to vote out the Militia Commander on 27 June 2026 was not a meeting of this Assembly. **The men and women it voted about were never told it was happening, were given no opportunity to answer, and have still not been shown a complaint or an accuser.**

- No notice of it went to the membership of The Nevada Assembly.
- It appeared on no published agenda of this Assembly.
- It was announced as a "State of the Union meeting," held on a Saturday, hosted by Rockie and chaired by Tamara.
- Fourteen people are claimed. This Assembly's roll stands at **391 recorded members on Nevada**.
- This Assembly's standing officials and its general membership were neither told nor present.

*The following is from the recording's automatic captions and has not been checked against the audio. We give it to you in that condition rather than leave it out. Minutes before the vote, Rockie stated his own test for what would be improper: "if the people can't get in their meetings and they take four or five people and vote them in... I would call that fraud."*

**A vote taken without notice to the people it concerns, at a meeting this Assembly was never told about, removes no one.**

## Two. The two accusations of conflict of interest

---

**What was said.** That the Militia Commander's part-time work serving process for the District Attorney is a conflict of interest. And that Doug Hulsebus *"works 'voluntarily' for the fire dept. Yet, he's married to Sue. Conflict of interest."*

**What the record shows.**

On the District Attorney work: Michael Wilson does serve process, forty hours every two weeks, and has never concealed it. Rockie put the question to Anna Riezinger on the Coordinator call of 25 June 2026. **We give you her whole answer rather than the part that helps us.** She said there were grounds for a conflict — and she named exactly what would create one: *is he sharing private information with the District Attorney, and is he engaged in a targeting program?* She then added, in the same breath, *"Not that anybody's planning anything wrong."*

**Neither condition has ever been alleged against him with particulars** — not on that call, not since, and not in the complaint now before the Continental Marshal Service. No instance, no date, no document.

On Doug Hulsebus: Rockie's own sentence concedes the work is unpaid. The published Federation test for a coordinator conflict is financial — *"no substantial conflict of interest, such as having significant income from foreign sources."* And in the same 26 August email in which she otherwise supports Rockie, Anna Riezinger states her own position on this allegation: *"I do not necessarily assume any conflict of interest based on the work or marital relationships."*

## Three. The vetting accusations

---

**What was said.** That Sue Hulsebus *"has not been vetted correctly... We have asked for this information multiple times."* That Tamara Amaral *"has been vetted, approved by Anna, chosen by the People."* And that coordinators *"can work on their town, county, union state or state of the union... or only on what they prefer."*

**What the record shows.**

**On the Coordinator's vetting,** three independent sources, none of them this Assembly's word:

| Date             | What happened                                                                                                                                                  |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 20 January 2022  | She purchased her own background check — American State Nationals, \$30.00 — and reported it the same day to the Federation and to the then State Coordinator. |
| 24 February 2022 | The Federation administrator running the vetting program: <i>"Thanks, I will get your Background Check ordered."</i>                                           |

|                      |                                                                                                                                                                                                                                              |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>23 March 2022</b> | <i>"I will order your Background Check in the morning... When I get the Background Check I will fwd it to you along with the directions for the Marshals Form."</i>                                                                          |
| <b>25 March 2022</b> | The commercial vendor that performed the check wrote to her directly with the disclosure and authorization. The same morning, the Federation administrator's subject line: <b>"Susan Beth Ysmael-Hulsebus Background Check - Completed."</b> |
| <b>11 April 2022</b> | <i>"the Marshals will check your references first... you will get an email from the marshals with a possible date and time for your interview."</i>                                                                                          |

The word in the allegation is *correctly*, which implies a standard. **The standard is the one set out above by the man who applied it — and the process he describes ends at the Continental Marshals.**

On *"we have asked multiple times"*: on **7 July 2026** the Coordinator put the demand back to the people making the allegation, in writing, with Anna Riezinger and Rockie both copied, and asked them to produce their evidence. Neither answered, and nothing was produced.

And this is not the first time these allegations have been examined. **It is the second time, and the first time began the same way this one did.**

On **28 March 2025** an email arrived convening a meeting for 30 March. It displayed as *"The Nevada Assembly."* The reply-to displayed as *"The Nevada Assembly."* The address underneath was a Clark County address. **Two days later, that meeting voted 36 to 0 to bar Sue and Doug Hulsebus from holding any office in The Nevada Assembly.** Neither was charged, tried, or heard. Rockie reported that vote to the Federation under the subject line *"We struck gold in the Silver State Anna!"*

**Fifteen months later, fourteen people at a meeting this Assembly was never told of purported to remove its Militia Commander. It is the same act, done twice.**

The allegations behind the March 2025 vote then came to this Assembly's own **Oversight Committee**, which investigated Sue and Doug Hulsebus in 2025. It ran 11–30 April across four meetings. On 11 April the Chairwoman put the burden in writing: *"I am not the one making allegations against Sue and Doug Hulsebus. You are... Only communication from now on will be your burden of proof."* Sue and Doug recused themselves. The interim finding of 26 April: *"Rockie Roper is a False Witness."* The Final Report of 11 May 2026 records that the evidence *"was never presented."*

**On Tamara Amaral.** The Nevada Assembly has never vetted or approved her as a Coordinator, and no Assembly vote approving her has been produced. There is a fact here in her favor and we state it: on **5 March 2026** the Coordinator personally wrote the Chief Continental Marshal to begin Tamara's vetting and helped her into the Federation's training. **That was a courtesy extended by our Coordinator. It was not a conferral, and it was not an act of this Assembly.** As to *"approved by Anna"* — no instrument has been produced or located, and it was demanded in the Response served on 1 July 2026. As to *"chosen by the People"* — their own published account says *"She just stood up as a State Coordinator."*

**On which lane Rockie works in.** *The following is from automatic captions, not checked against audio.* On the Federation Coordinator call of **11 December 2025**, Anna Riezinger said: *"you, Rocky, are organizing a COUNTY ASSEMBLY. So you're organizing the UNION STATE. You're NOT COMPETING with anybody who is a coordinator for the STATE OF THE UNION Nevada."* Rockie answered: *"Yeah, I don't want to compete with that,"* and *"what I've been organizing is the Union State... That's my focus."*

On **27 February 2025**, this Assembly's Vetting Committee unanimously **disapproved** him for Clark County Coordinator — a conditional disapproval carrying a four-week course correction that was never completed. **No State Coordinator vote concerning him has ever taken place on Nevada.**

## Four. Records and access

**What was said.** That *"the North voted for recording secretaries to have no access on Teri's LRO. So, how are we going to have access to our information?"* And, signing as *"Nevada Coordinator,"* that *"we, the Nevada Assembly have brought this up many times."*

**What the record shows.**

**The roll is not a mailing list.** It is derived from the Land Recording Office, where a member's political status, county and standing are recorded by State-level Recording Secretaries. A county receives county-scoped access, from the State, for county business. **No county on Nevada has ever held the statewide roll. That is a structural boundary, not a deprivation.**

**He voted that access away himself.** On **2 June 2026** he reported, in his own email, that his meeting had voted **21–0** to adopt a Land Recording Office of his own creation as "the Nevada LRO," and **22–0** not to recognize this State's records administrator "as anything in Nevada." Eighty-four days later he wrote to the Continental Marshal Service asking how his people are to have access to that same administrator's LRO.

**What the August 2026 motions actually did.** They addressed **two individuals by name**, not a class, and the ground was conduct. This Assembly's own Recording Secretaries had recorded cleanly for years, and then began entering addresses on a copycat domain in the **State Coordinator field of official member records** — one recorder on four intakes between September and October 2025, a second on one intake in May 2025. Rockie is not the State Coordinator. **The entry is false on the face of an official record.** The motions passed 14–1 on 5 August 2026 and were referred to this Assembly's Guidelines, Processes and Procedures Committee, **which is still deliberating. Nothing has been finally executed.**

## Five. He would not take the paper

Between October 2025 and March 2026, this Assembly tried to place documents in Rockie's hands **four times, by three methods.** A licensed professional was the last resort, not the first move — **the Assembly tried twice by ordinary tracked mail first, and hired anyone only after that failed.** And this sits on top of the written notices: **four served on the parties to this matter, and seven concerning the domains since March 2026, six of those private. None of the eleven was ever answered.**

|   | Date                    | How                                                                                                 | What happened                                                                                                                        |
|---|-------------------------|-----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>15 October 2025</b>  | Tracked Priority Mail                                                                               | <b>Accepted.</b> He answered it eight days later.                                                                                    |
| 2 | <b>7 November 2025</b>  | Tracked Priority Mail, same address                                                                 | Delivered to a parcel locker on 10 November. Never collected. <b>Returned unclaimed on 2 December.</b> The envelope is still sealed. |
| 3 | <b>28 February 2026</b> | Personal service by a licensed process server, at a public library where his meeting was being held | <b>Blocked.</b> See below.                                                                                                           |

|   |                       |                                          |                        |
|---|-----------------------|------------------------------------------|------------------------|
| 4 | <b>5–6 March 2026</b> | Personal service at his residence, twice | No answer either time. |
|---|-----------------------|------------------------------------------|------------------------|

**He accepted the first one and has accepted nothing since.**

The process server is a registered Nevada professional, Registration Number R-2024-03965, with no stake in this dispute. She swore a declaration **under penalty of perjury**. Her own words, from that declaration:

*"I arrived at the library where the meeting was being held. While I was asking questions and attempting to approach the defendant, several bodyguards stopped me and would not allow me to pass. It was a little aggressive... The bodyguards escorted me out and refused to allow me access. I will wait and attempt to serve the documents after the conference."*

She did wait. She came back an hour later:

*"One of the bodyguards began recording me. When I attempted once more to approach, I was asked to leave. I noticed that the defendant was no longer in the conference room and it appeared that a guards had escorted him out through the back doors." (sic)*

**Read what that describes.** He was in the room. Several people physically stopped a licensed server from reaching him. When she waited them out, he was taken out the back while she was held at the front. **That requires arrangement. It does not happen by accident.**

And it happened **in a public library**. The people who blocked her were not library staff, not the property owner, and not public officials. **A group that books a meeting room in a public building gets the use of the room. It does not get the authority to post guards and bar a member of the public from a public space.**

We will say one more thing about it and then leave it alone. The complaint that runs through everything Mr. Roper has written for two years is **exclusion** — that his people were shut out, not heard, decided about without being present. Set that beside what this Assembly actually did: served him by tracked mail twice, hired and paid a licensed professional, attempted service at a public meeting and twice at his home.

**A man with an answer takes the paper.**

## **Six. He has never been shut out, and the record is not close**

The same period, the other side of the ledger:

- **Where anyone has said they were shut out, this Assembly can document what actually happened.** Where a genuine gap existed, it was corrected. Where it did not, the list server's own record shows what was sent to that person's address, campaign by campaign, with dates.
- **Rockie is a subscriber on this Assembly's list server and his subscription has never been disabled.**
- **He was invited in writing to this Assembly's Union States Assembly** — to its inaugural meeting on **24 January 2026** and again on **20 June 2026**, on the visible copy line by the Militia Commander's express instruction, so the record would plainly show it. The executed minutes record him **"Invited, not present."** The other invited members came.
- **That body carries the name it does because of him.** It was named the Union States Assembly so that Rockie, as the Federation's Union States coordinator, could be invited to sit at the table with this State's county facilitators.
- **The Federation's own Peacekeeping Task Force recorded the same thing** on 23 May 2026: *"Rockie Roper (appointed Union State coordinator) claims to hold Union State meetings but never*

*invites county facilitators from Nevada. The Nevada Assembly formed its own Union State Assembly and invites Rockie — Rockie does not attend."*

- **And on 29 July 2026, mid-election, he forwarded this Assembly's own live ballot to his distribution,** with a read receipt requested. The message headers carry this Assembly's campaign identifier. His covering words: *"If you have not voted on this take the time to do so. We already voted on this but they are still trying to change the logo for the Nevada Assembly."* He tells his list they have already voted on the same question — a vote this Assembly never called and never counted. **And he calls The Nevada Assembly "they."**

**He is on the roll, on the list, and invited to the table. What he has declined is to come, and to answer.**

**And the pattern is not his alone.** The people most closely aligned with this second structure have gone on using what this Assembly provides — its list server, its records office, its meetings and its instruments — while declining to answer to it. The clearest instance is in Section Four above and it is entirely their own doing: **on 2 June 2026 they voted 21–0 to adopt a records office of their own creation and 22–0 not to recognize this State's records administrator "as anything in Nevada" — and eighty-four days later asked the Continental Marshal Service how they were to have access to that same administrator's records.**

**We do not and will not say how any member voted on anything.** Ballot returns are anonymous, for every member, without exception.

## Seven. The domain complaints

**What was said.** That Michael Wilson went to Rockie's *"personal internet provider and told them we are a scam artist"*; that it *"shut down all my stuff"*; that this was done *"to stop us from assembling"*; that he is *"personally attacking and harassing"* him; and that it is *"the second time that Michael Wilson has shut down our domains."*

**What the record shows.**

**The phrase "scam artist" appears in no complaint this Assembly filed.** Rockie's name appears nowhere in any of the six complaints. They refer to *"the Cox subscriber assigned 98.167.117.6," "the account holder,"* and *"the registrant"* — because that is what the record itself identifies.

**None of the complaints mentions meetings, assembling, or association.** The grounds pleaded are the providers' own acceptable-use terms: impersonation, trademark, and bulk mail.

**The complaints name no individual and ask for no outcome.** They disclaim adjudication four times in terms — *"We are not asking Cox to adjudicate who The Nevada Assembly is"* — and disclose, against this Assembly's own interest, that it holds no trademark registration: *"We do not assert a federal or state trademark registration, and we would rather disclose that than have you discover it."* A later filing withdrew one of its own grounds as unsupported.

**The count is right and the agency is wrong. Commercial providers decided, applying their own rules.**

| Date | Who decided | What they concluded |
|------|-------------|---------------------|
|------|-------------|---------------------|

|                |                                       |                                                                                          |
|----------------|---------------------------------------|------------------------------------------------------------------------------------------|
| 21 March 2026  | The registrar                         | Declined to act                                                                          |
| 23 March 2026  | The same registrar, on the same facts | Reversed itself and suspended the copycat domain under its own Terms of Service          |
| 25 August 2026 | The registrar                         | Suspended two further domains, including one this Assembly had never asked to be touched |

## AND THEN THE SUSPENSIONS CAME OFF. THIS IS THE PART WE ASK YOU TO READ TWICE.

On **31 March 2026** Rockie asked the registrar to restore the suspended domain, writing from an address on one of the copycat domains. He argued for a full day and it failed. On **1 April** the registrar answered that he must obtain prior authorization from the organization before using its content, and asked him for one thing:

▮ ***"Proof of authorization with the 'Nevada Assembly'."***

**He did not obtain that authorization. At 9:53 that evening he answered as the organization whose authorization had been demanded** — from rockie.roper@nevadaassembly.org, a mailbox on this Assembly's own mail system, over the signature *"William Rockie Roper © / Nevada Coordinator"*:

▮ ***"This is a coordinator of the Nevada Assembly and I am requesting you to take the suspension off of our domain."***

In the same message, of this Assembly's Militia Commander: *"Michael Wilson does NOT have any authority to speak for the Nevada Assembly."* Of its Coordinator: *"The other coordinator Sue Hulsebus has been placed on suspension for her involvement in this attack."* And to the company itself:

▮ ***"If this suspension is not lifted within 7 days, we will be placing a lien on your company and getting a lawyer to sue for damages to all parties involved."***

The next morning the registrar wrote back: *"Please note that the domain name has been un-suspended from our end."*

**This Assembly did not authorize that letter, was not told of it, and would not have made it. It has never threatened a lien against any man, woman, or company.** That threat went to a commercial registrar in the name of the People on Nevada, by a man they had not given the office he signed under.

**Three things are worth stating plainly, and then we will stop.**

1. **Nobody broke in.** The mailbox was his — rockie.roper@nevadaassembly.org, an address on this Assembly's own mail system, issued to him during an earlier period when he was working alongside this Assembly. **Why it was issued, and by whom, is not established in this Assembly's record and we are not going to guess at it.** What is established is that it was still live in April 2026 because this Assembly had not closed it. **That was our oversight and we own it.** The account was found active on 8 July 2026 and deactivated that day — the same day the registrar refused this Assembly's complaint on the strength of a letter sent from it. **Leaving it open was our failure. What was done with it was not.** 2. **He knew he did not hold the office he signed.** The Vetting Committee had disapproved him on 27 February 2025, and no State Coordinator vote concerning him has ever taken place on Nevada. 3. **We did not guess at any of this.** On **30 August 2026**, six members of this Assembly opened its own mailboxes on its own mail system, on a recording, and read the correspondence for themselves.

**What it has cost.** The registrar now treats the whole matter as *"an internal misunderstanding or dispute within your organization"* and holds that any further action would require a valid Court Order. **A question about this Assembly's own name, among people on Nevada, has been converted into one a private company will reopen only for a court — by a representation made in this Assembly's name, without its authority.**

## **What this Assembly did before any of it reached the Continental Marshals**

---

- **13–14 April 2025** — a written complaint to this Assembly's own Oversight Committee, copied to the Federation. Never answered by the Fiduciary or the Federation.
- **11–30 April 2025** — the Oversight investigation, four meetings, burden placed in writing, nothing produced.
- **March 2026 onward** — seven written notices concerning the domains, six of them private. **None answered.**
- **1 July 2026** — a written Response served on the Chief Continental Marshal **by name**, together with Tamara, Rockie, Anna Riezinger and Mr. Hayse. It asked one question: produce the instrument conferring the authority being claimed over this Assembly. Its words: *"an authorization that cannot be shown, and that could confer nothing if it were, is no authorization at all."*

**No one answered it. That was two months before Rockie wrote to the Continental Marshal Service.**

- **17 August 2026** — a joint Notice served on Tamara and Rockie. **18 August** — the membership told, the day after the parties were served. That is this Assembly's practice throughout: **serve the party, then inform the membership. No accusation about anyone has ever reached this roll before the person concerned had it in their hands.**

## **Where this leaves it**

---

Every allegation above has now been answered four times — before this Assembly's Oversight Committee, before the Fiduciary, before the Federation, and before the Continental Marshal Service. **They have been sustained on none of them.**

This Assembly asks nothing of the Continental Marshal Service, of the Federation, or of any body affiliated with either, beyond one thing: **that the record be accurate.**

It has not asked that any man or woman be removed from the American States Assemblies or stripped of political status. Whatever standing each of them holds as an American State National is theirs, and this document does not touch it. **What has to stop is the operation of a separate structure in this Assembly's name.**

The way back has been open at every stage and has not once been taken. **This Assembly's meetings, its Militia, its jury pool, its committees and its offices are open to every American State National on Nevada who comes to them through this Assembly's own process — including the men and women named in this document.** That door has never been closed and is not closed now.

Issued by the elected officials of The Nevada Assembly.

**Michael T. Wilson** — Militia Commander, The Nevada Assembly — [militia.commander@nevadaassembly.org](mailto:militia.commander@nevadaassembly.org)

**Louis Moglia** — Chief Justice, The Nevada Assembly — [chief.justice@nevadaassembly.org](mailto:chief.justice@nevadaassembly.org)
